System and Unit Test Report 1

Actions to stop doing:

- The team should stop holding scrum meetings over 15 minutes because the meetings go slower as a result.
- The team should focus on the project during the meetings and stop wasting time talking about other topics.
- The team should plan out the scrum meetings well in advance and not spur of the moment

Actions to start doing:

- Talk about objectives and figure out the importance of each objective.
- Discuss more about that each team member is doing so we can figure out how we are going to combine our efforts. Work together in allotted time to further understand how our work is contributing to the project.

Actions to keep doing:

- Keep finding ways to help the team uniquely(each member had a goal to do that was unique to each other)

Work completed/not completed:

Completed:

User story (As a programmer, I want a homepage for the website I'm using)

User story (As a programmer, I want a set of problems to practice from)

Not completed:

User story (As a programmer, I want to be able to test my code in the website)

User story (As a programmer, I want a set of problems to practice from)

Work completion rate:

Total number of user stories completed during the prior sprint: 2

Total number of estimated ideal work hours completed during the prior sprint: 20

Total number of days during the prior sprint: 7

User stories/day: $2/7$

Ideal work hours/day: 2.86
